

**TOWN OF GREENWOOD
SPECIAL MEETING OF THE BOARD
MAY 15, 2023**

The special town meeting (road inspection) for the Greenwood Town Board began at 6:00pm at the town hall. Present we're Chairman Mitch Peters, Supervisors Travis Fuchs and Michael Wudi, Graderman Kurt Bube and Randy Thums.

The group traveled to look at washouts and possible repairs necessary on Tower Avenue and River Road. After viewing the areas and discussion of possible alternatives to fix the roads damaged by spring flooding it was decided to apply for disaster relief funds to cover the cost of fixing this damage. Motion by Fuchs, seconded by Wudi to apply for disaster relief funds. Motion passed unanimously.

Discussion was then held to put together an estimate of materials and labor needed to fix this damage. Estimates were made for the amount of breaker run and crushed gravel needed to repair and lift the roads in those damaged areas. An estimate was also made for the amount of rock needed to install along the bank of the Rib River along River Road to stop the river current from undercutting the road. This will be included in the disaster relief application pending DNR approval. Chairman Peters will total those estimates and prepare the disaster relief application.

A culvert replacement on Lemke Creek Road was also inspected by the group. The group also traveled to Wellington Lake Road to view the site of a potential road project in the future. This project was postponed until at least next summer. The road inspection ended with the group returning to the town hall at approximately 7:45pm.

Respectfully submitted by M. Wudi
